padmasambhavadigital.com

Systems-First Marketing Technologist specializing in Marketing Operations (MOPs), API-driven pipelines, and infrastructure troubleshooting. I eliminate manual chaos by engineering leak-proof tracking, automating complex workflows (Zoho, n8n, Deluge, Webhooks), and deploying AI-assisted scripts. Proven mentor and operational leader with a 4.70/5.0 CSAT rating across 130+ learners for translating complex backend logic into actionable, step-by-step documentation.

PROFESSIONAL EXPERIENCE

MOPs & Technical Enablement Specialist

Jan 2025 – Present

STAENZ Digital Marketing Academy

- Cross-Platform Pipeline Architecture:** Engineered multi-step automated event delivery systems (FunnelKit → Zoho Flow → Deluge Script → AiSensy API) for SuperAZENTS 2026, eliminating manual check-in friction.
- AI Knowledge Base & RAG Telegram Bot:** Architected an AI-powered support bot utilizing Python (bot.py), Groq API, and a custom Knowledge_Base.json schema to automate resolution of repetitive operational queries.
- Zero-Friction Digital Attendance Engine:** Modernized cohort tracking by replacing paper logs with an automated Google Forms → Sheets pipeline featuring session validation codes and dynamic Pivot Table reporting.
- Technical Doubt Resolution:** Achieved a 4.70/5.0 technical issue resolution rating across 130+ students by troubleshooting WordPress configurations, DNS mapping, and Meta Ads integrations.

Growth Systems & MOPs Consultant

Oct 2025 – Present

Padmasambhav Digital (Independent)

- Server-Side Tracking (sGTM):** Configured Meta Conversions API (CAPI) using Google Tag Manager on Google Cloud Platform with custom DNS routing to bypass client-side ad blockers.
- Financial Reconciliation Engine (Madhechi):** Built an automated data transformation workflow using Excel Power Query to deduplicate and reconcile Shopify transaction exports against Razorpay settlement reports.
- Incident Recovery & Security:** Remediated 3 compromised WordPress deployments, purged database injections, restored media directories, and verified Razorpay gateways for zero cash-flow interruption.
- E-Com Architecture & Dynamic CRO:** Developed custom WooCommerce and Shopify workflows featuring automated Zoho Books invoicing and dynamic 1st-party cookie pricing logic via GTM.

Digital Operations & B2B Enablement

Jun 2021 – Sep 2025

Swami Samarth Electronics Pvt. Ltd.

- Enterprise Portal Setup:** Directed vendor registration and technical catalog configuration across the Government eMarketplace (GeM), facilitating enterprise compliance and a 10,000-unit government order.
- Digital Asset Infrastructure:** Structured company-wide technical documentation, digital spec sheets, and high-resolution commercial photoshoots in Google Workspace for streamlined sales distribution.
- Multi-Channel Catalog Operations:** Managed catalog listings, RFQ handling, and handler coordination across B2B aggregators (IndiaMart, TradeIndia).

PEER & STUDENT VALIDATION

"I appreciate his ability to break down highly complex technical issues into simple, step-by-step solutions during troubleshooting. His immense patience ensures no student is left behind."
— Jaswandi (7:30 AM Batch)

TECHNICAL CAPABILITIES

MOPs & AUTOMATIONS

- Zoho Flow
- Custom Deluge Scripts
- Make.com / n8n
- Webhooks & HTTP APIs
- AiSensy WhatsApp API

DEVELOPMENT & TOOLING

- Python (LLM Integration)
- Groq API & RAG JSON
- Excel Power Query
- Custom HTML/JS DOM logic

TRACKING & DATA

- 1st-Party Cookies
- Meta CAPI
- Server-Side GTM (sGTM)
- GCP Cloud Setup
- Looker Studio

WEB & E-COMMERCE

- WooCommerce
- Shopify Flows
- WordPress (DB/wp-config)
- Razorpay Integrations
- Malware Remediation
